

A project by the Lake Windermere District Rod & Gun Club
in partnership with Columbia Wetlands Stewardship Partners

TURTLE BASKING LOGS

In the beginning we just had logs and cement blocks

Then we hewed and bored to make basking logs

We transported the logs over water to get to sites

And Now The Fun Begins!

Getting things ready at water side.

Location! Location! Location

There was grunt work followed by resting

Was it worth it in the end – you bet!

Friends came over to look

And yes – There was even a log warming party!
